

Phelan's INTERIOR GLOSS

DIRECTIONS

Stir contents of can thoroughly, and if thinning other than is specified in the following directions is necessary, use pure turpentine only.

Apply Phelan's Interior Gloss to a clean, dry surface, free from dust, dirt and grease. Checked or marred painted surfaces should be sanded smooth.

NEW PLASTERED WALLS

FIRST COAT — Mix Phelan's Interior Gloss with an equal quantity of Phelan's Texize. Thin further with turpentine as conditions may require. Allow at least 24 hours for drying. If flat spots appear, coat over before applying second coat.

SECOND COAT — Apply Phelan's Interior Gloss as it comes in the can, or thin slightly with turpentine if necessary.

OLD PAINTED WALLS

FIRST COAT — Thin Phelan's Interior Gloss in proportion of one-half pint turpentine to the gallon. Allow at least 24 hours for drying.

SECOND COAT — Apply Phelan's Interior Gloss as it comes in the can, or thin slightly with turpentine if necessary.

KALSOMINE WALLS

Wash off old kalsomine thoroughly, then follow directions as for new plastered walls.

WATERBOARD, BRICK OR CONCRETE

Follow directions as recommended for new plastered walls.

WOODWORK

FIRST COAT — Apply Phelan's Interior Gloss thinned in proportion of one pint turpentine to the gallon. Allow at least 24 hours for drying.

SECOND COAT — Apply Phelan's Interior Gloss as it comes in the can, or thin slightly with turpentine if necessary.

METAL SURFACES

Follow instructions as recommended for new plastered walls.

Phelan's

INTERIOR GLOSS

A Beautiful, Washable Finish for Walls and Woodwork

INTERIOR Gloss is an artistic, all purpose interior finish, made in white and eight modern tints. It is an enamel-like product, highly decorative, long wearing and remarkably economical.

Interior Gloss is easy to apply. It is a product of exceptional covering power, ideal for the householder and practical painter. It is intended for use in finishing interior walls and ceilings of homes, apartments, office buildings, schools, churches, hospitals, hotels and public buildings. Interior Gloss is equally well adapted to use on interior woodwork and furniture, especially in the kitchen, bathroom, nursery or laundry. It lends a distinct sense of cheerfulness and cleanliness wherever used.

In Interior Gloss there is embodied easy working, remarkable spreading, excellent hiding power and permanency of color—a combination of unparalleled features. A surface coated with Interior Gloss is resistant to rough usage. Frequent washings in no way affect the wearing service of this superior product.

Interior Gloss can be used on new unpainted walls or woodwork, as well as on previously painted surfaces with the same pleasing result. Two coats are required in most cases.

Interior Gloss is prepared from non-poisonous zinc pigments, and the vehicle used in its manufacture is especially treated oils, refined by our own process. Possessed of extreme durability, this paint is worthy of use where the finest brilliant, gloss finish is required.

Interior Gloss must be applied to a clean surface. Follow directions carefully—remove all dirt, grease and dust. On unfinished plastered walls we recommend the use of Phelan's Texize as a size coat.

Interior Gloss is the ideal Interior Finish.

It will give you pleasing service—long service—and economical service.

OPENING

The spreading capacity of Interior Gloss differs with the surface. Being an oil paint, it will cover considerably more surface per gallon than similar products of this character—a fair average being from 450 to 550 square feet to the gallon.

PACKAGES

Gallon, Half-gallon, Quart and Pint cans. Also in Five-gallon containers, Half-barrels and Barrels on special order.
